

Iteration Log

Project

School Administration Office – Bollywood Film Set Recreation

Objective

Create two photorealistic renders of the same school administration office:

1. Day Shoot – bright, active, professional atmosphere.
 2. Night Shoot – warm, cinematic, after-hours atmosphere.
-

Iteration 1 – Initial Prompt

Changes

- Added office furniture and administrative elements.
- Introduced basic daylight and night lighting descriptions.
- Focused on photorealistic rendering quality.

Result

- Good architectural detail.
- Images appeared similar to architectural visualization renders.
- Environment lacked emotional storytelling and cinematic realism.

Issues Identified

- Space felt too clean and artificial.
- Insufficient Bollywood film-set atmosphere.
- Lighting lacked depth and realism.

Iteration 2 – Cinematic Enhancement

Changes

- Added Bollywood production design direction.
- Introduced environmental storytelling through files, certificates, trophies, and office activity.
- Improved camera and cinematography instructions.
- Added realistic imperfections and material aging.

Result

- More believable workplace environment.
- Better emotional connection.
- Improved realism and depth.

Issues Identified

- Day and night versions still felt too similar.
- Night scene lacked a distinct after-hours narrative.

Iteration 3 – Day Scene Refinement

Changes

- Enhanced natural Indian daylight.
- Added active administrative atmosphere.
- Included signs of ongoing school operations.
- Increased brightness and visual energy.

Result

- Office felt busy, professional, and welcoming.
 - Strong daytime mood achieved.
-

Iteration 4 – Night Scene Refinement

Changes

- Removed tea cups, coffee mugs, snacks, and personal refreshment items.
- Added warm practical lighting only.
- Introduced late-night administrative storytelling.
- Darkened exterior windows completely.
- Enhanced shadow depth and cinematic mood.

Result

- Strong separation from daytime scene.
 - Realistic after-hours office atmosphere.
 - More emotionally engaging and film-like.
-

Final Version

Improvements Achieved

- Preserved original layout and furniture arrangement.
- Matched the director's brief and reference materials.
- Created distinct Day and Night moods.
- Enhanced realism through production design and environmental storytelling.
- Reduced AI-generated appearance.
- Achieved cinematic Bollywood film-set quality.

Final Output

- Render_Day.jpg
- Render_Night.jpg

- Iteration_Log.pdf

Rendering Goal

Ultra-photorealistic, cinematic Bollywood production design, realistic materials, authentic lighting behavior, film-quality storytelling, 8K resolution output.
