

Render 1 — DAY SHOOT PROMPT

Photorealistic Bollywood film set recreation of a school administration office, preserving the exact layout, proportions, wall positions, doors, windows, furniture placement, circulation paths, and camera perspective from the base set image. Do not redesign the floor plan. Apply all design refinements and material upgrades according to the reference pack while maintaining the original room structure.

The office appears fully operational and professionally maintained. Reception desk neatly organized with school files, admission forms, desktop computer, telephone, stationery holders, visitor register, notice boards, framed certificates, academic awards, school branding elements, staff schedules, organized storage cabinets, realistic office accessories, indoor plants, and subtle signs of daily activity.

Bright natural daylight enters through windows, creating soft shadows and realistic light falloff across desks, flooring, and walls. The atmosphere feels active, welcoming, clean, professional, and ready for a busy school day. Neutral color balance with realistic daylight temperature. High-end production design inspired by polished contemporary Bollywood campus dramas. Premium materials, realistic textures, natural reflections, authentic wood grains, clean glass surfaces, detailed fabric upholstery, realistic paperwork, and believable wear.

Ultra-realistic architectural visualization, cinematic photography, professional interior design photography, 8K resolution, global illumination, ray-traced lighting, physically accurate materials, volumetric daylight, HDR rendering, photorealistic shadows, depth of field, high dynamic range, realistic ambient occlusion, commercial film production quality, magazine-quality interior photography, Sony A7R V, 35mm lens, eye-level camera, ultra-detailed, hyper-realistic, natural colors.

Negative Prompt: redesigned layout, altered floor plan, extra rooms, unrealistic furniture placement, cartoon style, CGI appearance, low resolution, blurry image, distorted perspective, oversaturated colors, excessive clutter, fantasy elements, low-quality textures, unrealistic lighting, duplicate objects, empty office, dark exposure.

Render 2 — NIGHT SHOOT PROMPT

Photorealistic Bollywood film set recreation of the exact same school administration office shown in the daytime render. Preserve identical layout, room proportions, furniture positions, wall locations, doors, windows, décor placement, and camera angle. No redesign of any architectural element. Apply the same design upgrades, materials, furnishings, and reference-based details.

The office is now shown after school hours. No daylight is visible from windows. The entire scene is illuminated by practical interior lighting including warm ceiling fixtures, desk lamps, reception lighting, accent lighting, and realistic ambient illumination. The atmosphere feels cinematic, emotional, functional, and professional, suitable for an important after-hours office scene in a Bollywood drama.

Warm golden lighting creates depth, contrast, and realistic highlights across desks, cabinets, paperwork, glass partitions, and decorative elements. Soft pools of light, subtle reflections, realistic shadows, gentle falloff, and natural color variation create a believable nighttime environment. The office remains active and maintained, with files, computers, notice boards, awards, and administrative materials visible under warm lighting.

Premium production design, photorealistic materials, authentic office detailing, cinematic storytelling atmosphere, luxury film-set quality, realistic artificial lighting, ray-traced illumination, global illumination, HDR rendering, volumetric light effects, realistic reflections, ambient occlusion, depth of field, ultra-detailed textures, commercial architectural photography, 8K resolution, Sony A7R V, 35mm lens, eye-level perspective, hyper-realistic interior visualization.

Negative Prompt: daylight entering windows, changed layout, different furniture arrangement, blue daylight lighting, unrealistic neon colors, empty office, cartoon rendering, poor textures, blurry image, overexposed lights, distorted perspective, fantasy elements, low-quality rendering, altered architecture.

Render 1 — DAY SHOOT (Final Master Prompt)

You are the lead production designer, art director, set decorator, and cinematographer for a major Bollywood feature film. Using the provided base set image as the foundation, transform the unfinished school administration office into a fully realized cinematic environment while preserving the exact architectural layout, floor plan, room proportions, wall positions, window placements, circulation paths, furniture arrangement, and original camera perspective. Do not redesign the space. Every enhancement must feel like professional film-set dressing applied to the existing office.

Create the atmosphere of a prestigious Indian school administration office during a busy academic day. The office should feel authentic, operational, and emotionally believable, carrying the subtle energy of a place where administrators, teachers, parents, and students interact daily. Introduce realistic environmental storytelling through carefully arranged office materials: admission forms, student records, faculty notices, visitor logs, organized paperwork, desktop computers, office telephones, staff calendars, school branding, framed certificates, academic awards, achievement boards, trophies, notice boards, indoor plants, stationery holders, filing cabinets, and administrative supplies.

The environment should feel lived-in rather than staged. Include natural imperfections that exist in real offices: slight wear on desk edges, subtle fingerprints on glass partitions, gently creased documents, realistic fabric folds, minor variations in paint texture, soft reflections, slightly used office chairs, and believable signs of daily activity. Avoid the sterile perfection commonly seen in CGI renders. Every object should appear touched, used, and integrated into the story of the space.

The visual language should resemble a premium Bollywood campus drama. The office should feel emotionally grounded, visually polished, and production-designed with the attention to detail seen in high-budget Hindi cinema. The atmosphere should be welcoming, aspirational, professional, and full of life without appearing artificial.

Bright late-morning Indian daylight streams naturally through the windows, creating soft illumination and realistic shadow patterns across desks, files, floors, walls, and office equipment. Natural sunlight gently wraps around surfaces, producing subtle highlights and believable contrast. The room feels fresh, productive, and active, suggesting that important school operations are taking place. The mood is optimistic, energetic, and authentic.

Photographed as if captured during principal photography using a high-end cinema camera. Natural lens behavior, realistic depth of field, subtle focus falloff, true photographic exposure, organic color reproduction, film-quality dynamic range, cinematic composition, realistic reflections, physically accurate lighting, natural ambient occlusion, realistic material response, professional production design, practical realism, human-scale detail, and emotionally engaging storytelling.

Ultra-photorealistic film still, not CGI, not architectural visualization, not concept art, not 3D render. Looks like a real location photographed for a major Bollywood film. Authentic materials,

realistic textures, natural shadows, believable atmosphere, exceptional realism, cinematic storytelling, premium production quality, magazine-quality photography, Sony Venice cinema camera, full-frame sensor, 35mm lens, eye-level perspective, ultra-detailed, 8K realism.

Negative Prompt: CGI look, artificial render appearance, plastic materials, showroom perfection, empty office, unrealistic symmetry, fantasy design, futuristic office, over-sharpened textures, excessive HDR, game-engine graphics, cartoon style, low realism, distorted perspective, unrealistic lighting, AI artifacts, oversaturated colors, architectural visualization style, sterile environment, fake reflections.

Render 2 — NIGHT SHOOT (Final Master Prompt)

You are the lead production designer, art director, set decorator, and cinematographer for a major Bollywood feature film. Using the same school administration office from the daytime scene, preserve the identical architecture, layout, room dimensions, wall positions, furniture placement, decorations, office equipment, and camera perspective. No redesign, relocation, or alteration of the floor plan is allowed. The only transformation is the mood, atmosphere, and lighting appropriate for an after-hours cinematic scene.

The office remains fully operational and believable, retaining all administrative details established in the daytime version: organized paperwork, admission files, staff records, academic awards, notice boards, school branding, computers, telephones, visitor registers, stationery, filing systems, indoor plants, and realistic workplace accessories. The environment should continue to feel occupied and functional rather than abandoned.

Create the atmosphere of a late evening in a respected Indian school. Most staff have left, but traces of ongoing work remain. Open files on desks, softly illuminated paperwork, active computer screens, partially completed tasks, and carefully arranged administrative materials suggest that important work is still being completed. The office should feel emotionally rich and narratively meaningful, as if an important scene in a Bollywood drama is about to unfold.

No daylight is visible from outside. Windows appear naturally dark. The entire scene is illuminated by practical interior lighting: warm ceiling fixtures, desk lamps, reception lights, corridor spill lighting, wall-mounted lights, and ambient office illumination. The lighting should feel realistic and motivated by actual fixtures within the space.

Warm golden light creates a sense of comfort, responsibility, and quiet dedication. Soft pools of illumination reveal desks, paperwork, certificates, and school memorabilia. Gentle reflections appear on glass partitions and polished surfaces. Shadows are deep yet natural, creating cinematic depth without losing detail. Light falloff is realistic, with gradual transitions that mimic professional film lighting rather than artificial rendering.

The visual style should resemble a beautifully photographed after-hours scene from a major Bollywood workplace drama. Rich emotional atmosphere, realistic lighting behavior, carefully crafted production design, and authentic environmental storytelling should make the viewer feel present within the space. The office should feel alive even in its quietness.

Photographed during principal photography using a high-end cinema camera. Film-quality dynamic range, natural shadow detail, realistic color separation, subtle contrast, organic highlights, cinematic depth of field, practical lighting realism, physically accurate materials, realistic reflections, natural lens characteristics, premium production quality, professional cinematography, Sony Venice cinema camera, full-frame sensor, 35mm lens, eye-level composition, ultra-detailed, 8K realism.

Ultra-photorealistic film still, not CGI, not architectural visualization, not concept art, not 3D render. Appears as a real set photographed for a major Bollywood feature film. Emotionally

engaging, visually sophisticated, deeply realistic, premium production design, natural materials, authentic textures, cinematic storytelling, award-winning cinematography quality.

Negative Prompt: daylight through windows, blue exterior light, CGI appearance, architectural render style, plastic materials, futuristic design, artificial glow effects, unrealistic neon lighting, game-engine look, fantasy atmosphere, oversharpener, low realism, distorted furniture, changed layout, empty office, showroom appearance, AI-generated artifacts, unrealistic reflections, excessive HDR.

Prompt 1 day light

create a image Imagine you are the lead production designer and art director for a major Bollywood campus drama. Using the provided base set image, transform the unfinished school administration office into a fully operational, prestigious Indian school administration center while preserving the exact architecture, furniture placement, room proportions, camera angle, windows, doors, circulation paths, and original layout. Do not redesign the space.

The office is experiencing a busy school day. The environment feels energetic, welcoming, and full of activity. Administrative desks contain neatly organized admission forms, student applications, attendance registers, staff schedules, official school documents, desktop computers, printers, notice boards, academic awards, framed certificates, school achievement photographs, and institutional branding. Chairs are slightly pulled out as if recently used. Files are actively being processed. Bulletin boards display current academic information.

Natural Indian daylight floods the space through large windows, producing soft sunlight, realistic shadows, gentle reflections, and a bright professional atmosphere. Indoor plants appear healthy and well maintained. Surfaces show authentic usage with subtle imperfections, realistic textures, natural wear, and believable material aging.

The image should feel like a real frame from a Bollywood film, capturing the optimism and energy of a successful school day. Human presence is implied through environmental storytelling, but visible some people are required., make sure environment quite modern and realistic Photographed on a Sony Venice cinema camera, 35mm lens, natural depth of field, realistic color science, film-quality dynamic range, ultra-photorealistic materials, cinematic composition, authentic textures, real-world lighting behavior, premium production design, ultra-detailed, 8K resolution.

Negative Prompt: CGI render, architectural visualization, empty office, artificial perfection, futuristic design, unrealistic furniture, plastic materials, excessive HDR, fantasy lighting, AI artifacts, dark atmosphere, abandoned office, showroom appearance.

Prompt 2 night light

create a image in Imagine you are the lead production designer and cinematographer creating a pivotal after-hours scene for a major Bollywood drama. Using the same school administration office from the base set image, preserve the exact layout, architecture, furniture arrangement, room proportions, wall positions, windows, doors, and camera angle. No redesign or repositioning of any element. but no visible people are required.

create a image The office is now shown late at night after school hours. The building is quiet and mostly empty. No tea cups, coffee mugs, snacks, food items, or casual refreshments are visible on any desk. Workstations remain organized and professional. A few important files remain open, administrative paperwork is neatly arranged, and selected computer monitors glow softly, suggesting unfinished responsibilities and important decisions still being made. but no visible people are required.

The atmosphere is emotionally rich and cinematic. Warm amber ceiling lights, desk lamps, corridor spill lighting, and practical office fixtures create layers of realistic illumination. Outside the windows is complete darkness with no visible daylight. Light pools naturally across desks, certificates, trophies, and filing cabinets, creating realistic shadows and depth.

The mood should feel reflective, dramatic, and meaningful, like an important late-night sequence in a Bollywood film. Every material reacts naturally to the warm lighting. Glass reflects softly, wood surfaces glow subtly, and shadows transition smoothly. The office feels alive despite being quiet.

Ultra-photorealistic movie frame, not a render, not CGI, not concept art. Real cinema photography, Sony Venice cinema camera, cinematic lens characteristics, natural depth of field, realistic exposure, practical lighting, authentic production design, emotional storytelling, premium Bollywood film quality, ultra-detailed textures, realistic imperfections, true photographic realism, 8K resolution.

Negative Prompt: daylight through windows, tea cups, coffee mugs, food items, neon lights, futuristic atmosphere, empty abandoned office, CGI appearance, architectural render, oversaturated colors, artificial shadows, AI-generated look, game-engine graphics, unrealistic reflections, plastic materials.

Final Prompts_and_Rationale :-

Prompts and Rationale

Project Title

School Administration Office – Bollywood Film Set Recreation

Project Objective

The objective of this project was to transform an unfinished school administration office set into a fully realized cinematic environment suitable for a major Bollywood film production. Two photorealistic renders were created from the same base set:

1. Day Shoot – Bright, professional, active school atmosphere.
2. Night Shoot – Warm, cinematic, after-hours administrative environment.

The final output preserves the original layout, furniture arrangement, camera angle, room proportions, and architectural structure while applying all required design refinements from the reference materials.

DAY SHOOT PROMPT

Create a photorealistic school administration office for a major Bollywood film production while preserving the exact layout, furniture arrangement, room dimensions, wall positions, windows, doors, and camera perspective from the base set image.

The office should feel active, professional, welcoming, and operational during a busy school day. Include realistic administrative details such as admission files, student records, certificates, achievement boards, staff schedules, organized paperwork, desktop computers, office equipment, filing cabinets, notice boards, school branding, indoor plants, trophies, and professional reception elements.

Bright natural Indian daylight enters through windows creating soft shadows, realistic reflections, and a fresh atmosphere. Environmental storytelling should suggest ongoing school operations through neatly arranged documents and signs of daily use.

Avoid the appearance of CGI or architectural visualization. The image should resemble a real film set photographed during production. Include realistic material textures, subtle imperfections, authentic wear patterns, natural lighting behavior, cinematic composition, realistic depth of field,

Sony Venice cinema camera, 35mm lens, ultra-photorealistic quality, film-quality realism, and 8K resolution.

NIGHT SHOOT PROMPT

Create the same school administration office using the identical layout, architecture, furniture arrangement, room proportions, decorations, and camera angle from the daytime scene.

The office is shown after school hours. No daylight is visible outside the windows. The environment remains professional and operational with organized paperwork, certificates, school awards, administrative records, and office equipment.

Remove tea cups, coffee mugs, food items, and personal refreshments from all desks. The office should feel clean, disciplined, and work-focused.

Illuminate the scene using only practical interior lighting including warm ceiling fixtures, desk lamps, corridor spill light, and reception lighting. Create realistic shadows, natural light falloff, subtle reflections, and cinematic depth.

The atmosphere should feel emotional, warm, and dramatic, suggesting important administrative work continuing after hours. The image must resemble a real Bollywood film frame rather than a digital render. Use realistic materials, authentic textures, cinematic lighting, professional production design, Sony Venice cinema camera, natural depth of field, realistic exposure, film-quality storytelling, and 8K ultra-photorealistic output.

Design Rationale

Preservation of Layout

The director's brief specifically required that the existing floor plan, furniture arrangement, and room proportions remain unchanged. Therefore, all prompt instructions focused on visual enhancement rather than redesign.

Daytime Mood Strategy

The daytime scene was designed to communicate:

- Activity
- Professionalism
- Productivity

- Academic success
- Positive school environment

Natural daylight was selected as the primary light source because it reinforces realism and creates an energetic atmosphere suitable for daytime school operations.

Administrative details such as files, certificates, notice boards, and school achievements were included to strengthen the authenticity of the environment.

Nighttime Mood Strategy

The nighttime scene was designed to communicate:

- Responsibility
- Dedication
- Quiet productivity
- Emotional storytelling
- Cinematic atmosphere

Warm practical lighting was chosen to create visual depth and emotional engagement while maintaining realism.

Tea cups and casual refreshment items were intentionally removed to support a cleaner and more professional administrative setting.

Dark windows and controlled interior lighting help establish a clear distinction from the daytime version.

Realism Strategy

To reduce the appearance of AI-generated imagery, the prompts emphasized:

- Natural material imperfections
- Realistic lighting behavior
- Authentic office details
- Environmental storytelling
- Physical camera characteristics
- Film-production design principles

The prompts specifically avoided overly perfect surfaces, unrealistic reflections, excessive HDR effects, and common CGI visual artifacts.

Cinematic Direction

The visual direction was inspired by polished Bollywood workplace and campus environments. The goal was not simply to create an interior render, but to create believable film-set photography with emotional realism and strong storytelling.

Professional cinematography language was incorporated into both prompts to encourage natural camera behavior, realistic depth, and authentic visual composition.

Final Deliverables

- Render_Day.jpg
- Render_Night.jpg
- Prompts_and_Rationale.pdf
- Iteration_Log.pdf

Target Quality

Ultra-photorealistic cinematic imagery, authentic Bollywood production design, realistic lighting behavior, natural environmental storytelling, professional film-set appearance, and 8K resolution output.
